

A man is shown from the chest up, standing in a shower. He is facing left, looking down. Water is falling from a large, circular rainfall showerhead above him. The shower walls are made of dark, textured tiles. On the wall, there are two circular digital controls. The top one has a small display showing '38°C'. The bottom one has a small display showing a power button icon. The lighting is warm and focused on the man and the water.

TED

Thirty Eight Degrees

INTELLIGENT LUXURY WELLNESS

WELCOME TO TED

TED is an exciting new brand bringing innovative Digital Showering products to the UK market. Our mission is to deliver quality products, great customer service and amazing customer experiences through showering innovations for independent showrooms, merchants and consumers alike.

Technology

TED is proud to introduce a range of the highest quality digital products, including a WRAS approved design that meets stringent UK water regulations. With a vested interest in the environment, we aim to push water technology to the next level with a specific focus on energy consumption, water consumption and safety.

Experience

We have a wealth of experience in the UK KBB market, specifically digital showering, and feel that there is a real gap in the market for new and innovative products.

Design

We provide sleek and contemporary designs at affordable prices that can enhance the overall aesthetics of your bathroom. Our products are available in various finishes and styles to complement different bathroom decors.

6 REASONS TO UPGRADE TO DIGITAL

We understand the importance of safety, energy efficiency, and design in showering. TED Digital products offer a stylish, budget-friendly solution for an effortless experience with many benefits compared to manual showers.

Easy installation & maintenance

TED showers are designed for easy installation, eliminating the need for complex plumbing modifications. Suitable for both stud and solid walls, the digital interface operates independently of water pipes, meaning no direct piping to the control interface is required. See more details on page 37.

Energy efficiency

All TED Digital showers are designed to be energy-efficient, reducing water and energy consumption during use, leading to cost savings and reduced environmental impact.

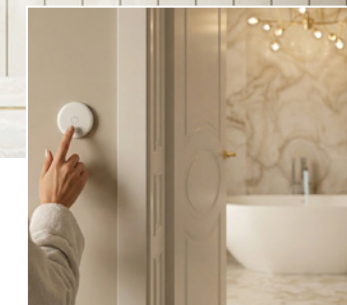

Precise temperature control

Our digital interfaces allow you to set and maintain your desired water temperature with great precision. This ensures a comfortable and consistent showering experience every time, without the risk of sudden temperature fluctuations.

Automatic safety shut-down

If the water or power supply fails, the shower will turn off completely preventing risk of scalding or sudden temperature spikes. This safety measures provide peace of mind, particularly in households with children or elderly individuals.

Wireless remote

With a wireless remote* you can start and stop the water from outside the shower. This feature is especially convenient for individuals with mobility issues. Additionally, the remote control ensures that water is delivered at your chosen temperature, enhancing safety for homes with young or vulnerable residents.

WRAS Approved

The TED TOGO series is WRAS approved. Having undergone independent testing, the products are fully compliant with the requirements of Water Supply Regulations and Scottish Byelaws.

WHICH DIGITAL SHOWER SYSTEM TO CHOOSE?

We have created a comparison table to assist you in evaluating and selecting the ideal TED digital interface that best suits your needs and preferences.

NEW

WYSE

Traditional timeless elegance. Digital precision.

The Wyse Traditional brings classic octagonal styling into the modern bathroom. With its distinctive brass controls and heritage-inspired backplate, it delivers the look of a traditional shower valve while offering the effortless control and safety of TED Digital technology. Perfect for period properties or any space where classic design matters.

Streamlined heritage styling with intelligent performance
The Wyse Traditional combines premium brass construction and classic detailing with advanced digital thermostatic control and comes with a 5-year warranty as standard. Start your shower with one press of the power dial, adjust temperature precisely with the rotary control, and divert between outlets instantly. The system maintains your chosen temperature consistently and automatically shuts down in the event of water or power supply issues for complete peace of mind.

Five luxurious finishes to complement any classic or contemporary scheme.

Chrome	Brushed Nickel	Brushed Brass	Polished Nickel	Polished Gold

RRP INC VAT

Distinctive octagonal backplate
Fits vertically or horizontally for complete design flexibility.

Precise digital display
Large, easy-to-read OLED screen shows exact temperature and selected outlet.

Wireless interface
Simple pairing with the concealed digital processor for a clean, clutter-free install.

- What's in the box**
- Box 1**
- 1 × 7.5 metre cable and communication cable
 - 1 × Mixing box
 - 1 × Diverter box (with multi outlet options)
 - 8 × Fixings and wall plugs
 - 1 × Washer filters
 - 1 × Power supply
 - 1 × Installation and user guide
- Box 2 (finishing set)**
- 1 × Power button and OLED screen
 - 1 × Interface (with multi outlet options)
 - 1 × Back plate

Selectable illumination ring
Choose classical white for added elegance or colour-changing LED lighting around the control dial for visual feedback.

Intuitive divert control
Clearly marked rotary dial lets you switch effortlessly between two or three shower outlets.

Cool-touch operation
All exposed controls and trim plates remain safe and cool to the touch.

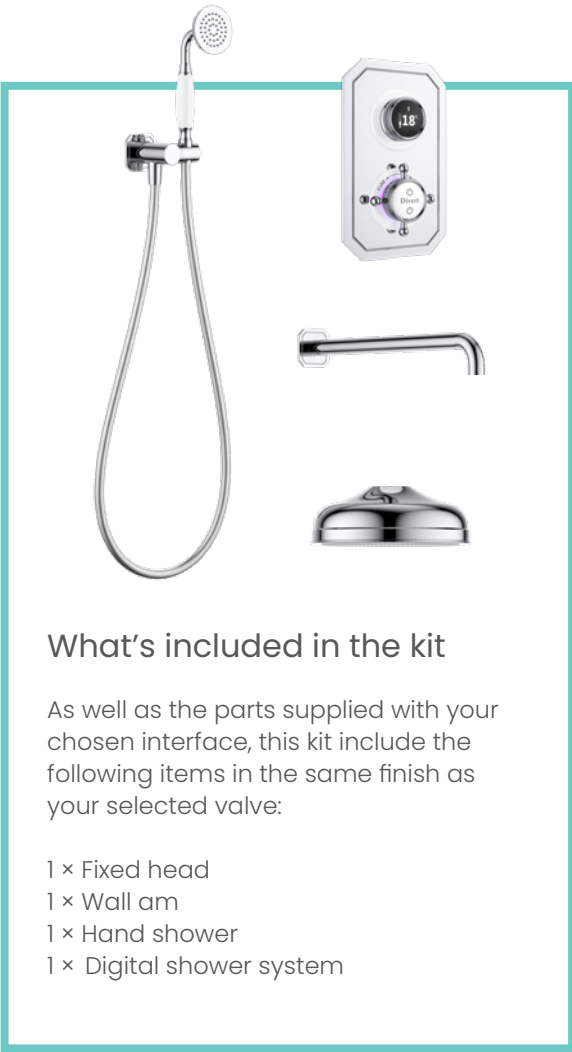

WYSE KIT

**Traditional style,
modern performance**

Designed to bring timeless elegance to any bathroom, this shower collection can operate up to three outlets, offering complete flexibility for a luxurious showering experience.

To complement the traditional aesthetic, the range also includes a 250mm fixed overhead shower, a wall shower, and a handshower set. The handshower features an adjustable holder, allowing the spray angle to be positioned for greater comfort and convenience, rather than being fixed in a single position.

All accessories are available in the same five finishes, enabling a fully coordinated bathroom design and a seamless, elegant look throughout.

What's included in the kit

As well as the parts supplied with your chosen interface, this kit include the following items in the same finish as your selected valve:

- 1 × Fixed head
- 1 × Wall arm
- 1 × Hand shower
- 1 × Digital shower system

2 OUTLET SHOWER KIT

COMING SOON

HERO

Intelligent control. Effortless luxury.

HERO is a sophisticated two-outlet digital shower system that combines intuitive technology with exceptional design. Crafted with a precision-engineered brass sleeve and elegant touch-control glass fascia, HERO delivers a seamless showering experience with refined tactile feedback and effortless operation.

Designed around the user

HERO automatically defaults to a comfortable 38°C temperature, providing a safe and consistent starting point for every shower. To begin, simply rotate the control dial. The intuitive interface responds with a subtle haptic feedback, creating a reassuring mechanical feel while maintaining the precision of a digital system.

Key features

- Two-outlet digital shower control
- Premium brass sleeve construction
- Touch-control glass fascia
- Available in six luxury finishes
- Choice of knurled or linear detailing
- Preset 38°C comfort temperature
- Simple rotary operation
- Integrated haptic feedback for enhanced user interaction
- LED backlight with colour-changing temperature indication
- Clean, minimalist design with advanced digital functionality

Visual temperature indication

A discreet LED halo illuminates from behind the control, changing colour to reflect the selected water temperature. This intuitive visual cue allows users to instantly understand and adjust their shower settings with confidence.

A new standard in shower control

Combining precision engineering, intuitive technology and timeless design, HERO transforms the everyday shower into a connected and luxurious experience.

Upgrade options to suit any bathroom

Finished in PVD Black Chrome as standard, HERO can be upgraded to one of five premium finishes for an additional cost.

Each finish can be specified with either distinctive knurled or contemporary linear detailing, allowing HERO to complement a wide range of bathroom styles.

VENN

Experience modern convenience with this sleek, state-of-the-art digital control panel.

Designed for precision and ease, it offers intuitive one-touch controls, pinpoint temperature accuracy, and a crystal-clear LED display. Customise your water flow and settings effortlessly, while the colour-changing LED backlight provides a visual cue for temperature, so you're always in control and perfectly comfortable.

Providing a straightforward and satisfying shower experience

With a minimalist design that seamlessly enhances any modern bathroom, VENN combines style with smart functionality. Built-in safety features guard against sudden temperature shifts, while eco-friendly modes help you save water without compromising on comfort. Choose from a sleek chrome finish and two or three-outlet models to perfectly suit your setup. Elevate your daily routine with a spa-like experience, every time you step into the shower.

Key features

- 320mm diameter brass shower head with built in water blade
- Comes with wireless controller
- Fixed mounted for a steady flow rate
- 56mm buttons and digital screen
- Flow and temperature controls
- Timer setting
- Independent diverter buttons
- Three outlet version can use two outlets at the same time
- Can be positioned vertically or horizontally
- Square brass backplate
- Switch between fahrenheit and celsius
- Operating pressure 1 bar

AVAILABLE IN
CHROME AND
MATT BLACK
FINISHES

Choose the configuration that best suits your bathroom and lifestyle

With the ability to operate up to three outlets, you can create the perfect showering experience, including combinations such as:

- 320mm fixed overhead shower, blade shower, and handshower set
- Fixed overhead shower, body jets, and handshower set
- Or any other combination to suit your individual requirements.

This flexibility allows you to tailor your shower system to deliver both luxury and performance while maintaining a cohesive traditional design.

Available in two premium finishes and 2 or 3 outlet options
Personalise your perfect shower with the Venn Series, available in two luxurious finishes and flexible 2 or 3 outlet options for enhanced comfort, convenience and style.

Smart shower control at your fingertips

The VENN Smart Wi-Fi Shower Controller brings convenience, comfort, and intelligent water management to your bathroom. Using the Smart Life mobile app, users can monitor and control water temperature, flow rate, operating modes, and usage data directly from their smartphone.

VENN Smart Wi-Fi Shower Controller

CODE	VEN-WIFI-MOD
RRP INC VAT	£99.00

Elevate your daily routine with VENN’s coordinating shower fittings

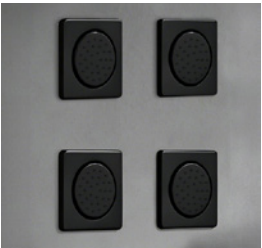

Enjoy the soothing sensation of rainfall spray, the refreshing power of body jets, or the flexibility of a three-function hand shower. Designed to work effortlessly with the VENN digital control system, these beautifully crafted fittings bring together luxury, innovation, and complete shower customisation.

TOGO

Our TOGO Series redefines intelligent showering, seamlessly integrating advanced technology and elegant design to enhance your showering routine effortlessly.

This exceptional collection establishes the benchmark for intelligent showering, harmoniously fusing cutting-edge technology with exquisite design engineering. Our mission is to make your daily shower routine effortlessly luxurious.

At the heart of this innovation is our digital display unit, seamlessly integrated into your bathroom. With two elegant dials, we offer a simple user experience with a host of captivating visual features. The power dial, adorned with a mesmerising play of colours, adjusts to your perfect temperature setting. Simultaneously, the digital dial provides you with all the essential details you need while you luxuriate in the comfort of your shower.

Further enhancing your experience, you can choose from our range of flute rounded trim or edge square trim, available in a selection of finishes including Chrome, Brushed Nickel and Matt Black.

WIRELESS BUTTON

Experience the convenience of complete shower control without the need for batteries, Wi-Fi, or Bluetooth connectivity. Our wireless button uses clever kinetic energy technology, generating enough power with every press to activate your shower and bring it to a comfortable 38°C.

COMPATIBLE
WITH ALL
TOGO SERIES
INTERFACES

Perfect for wet room installations, the wireless button allows you to position your main controls exactly where you want them. Rather than placing controls at the room entrance, install them within the showering area and use the wireless button to start your shower before stepping in.

Once showering, there's no need to move away from the water to make adjustments. Temperature changes and outlet diversion can all be controlled from within easy reach, delivering a more convenient and enjoyable showering experience.

WIRELESS BUTTON

- 45mm x 45mm
- Compatible with full TOGO range

CUBA

A sophisticated blend of minimalist elegance and advanced digital mastery.

The CUBA series features a sleek square design, with digital controls managing your shower, bath, or basin filling needs precisely.

Elegant design meets intuitive control

The softly glowing central button welcomes you with a default setting of 38°C for ultimate comfort. The surrounding controls allow effortless adjustments to flow and temperature, merging luxury and simplicity seamlessly.

Personalise your shower experience

The CUBA range sets a new standard in showering, combining cutting-edge technology with elegant craftsmanship. Drawing from Europe's rich technological heritage, this series transforms water into an interactive and memorable experience. It also embraces sustainability, delivering a luxurious flow at six litres per minute.

CUBA Series

- Digital mixing box
- CUBA square interface
- 100mm x 100mm

CODE	CUBA-BL
RRP INC VAT	£699.00

Key features

Pause Mode

Briefly interrupt your shower and resume with your saved settings.

Child Safety Mode

Set and lock safe shower parameters for children.

Customised Sequence

Curate sequences of temperatures and flow rates through a single outlet.

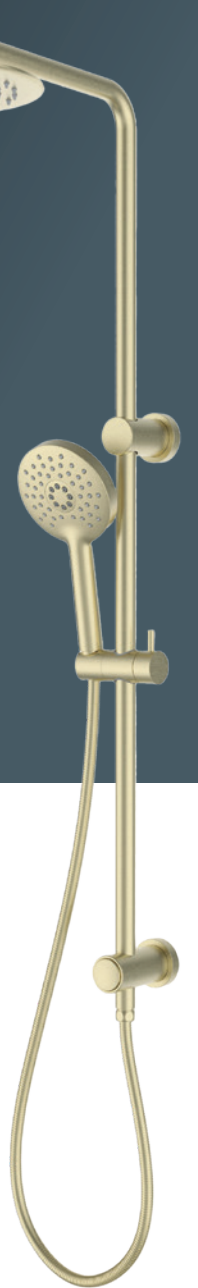

Anti-Scalding Feature

Safety comes first. Built-in temperature limits to prevent scalding.

MERSON PREMIER SHOWER KITS

Discover showering luxury.

COMPATIBLE
WITH CUBA
AND TOGO
SINGLE OUTLETS

The Merso Shower Kit works with our intuitive CUBA Interface and TOGO Single Outlet Digital Processors.

Create a 2 outlet shower and choose between the elegant Merso Square Shower Diverter with a 250mm Fixed Head & Single Mode Hand Shower or the versatile Merso Round Shower Diverter with a 250mm fixed head and three mode hand shower.

Select from three refined finishes, ensuring your shower is a perfect fit for both your style and bathroom aesthetics.

SQUARE MERSON SHOWER KIT

- 250mm fixed square head

BUBBLESPA®

Step into a world where innovation, luxury, and sensory delight converge. We introduce the BubbleSpa® shower, your gateway to an unprecedented showering experience that marries cutting-edge technology with the tranquil touch of nature's embrace.

View BubbleSpa®
in action

Unrivalled experience - The magic of bubbles

Discover the new BubbleSpa® shower, an epitome of our dedication to crafting the world's most enchanting showering experience. With over a decade of pioneering innovation, every detail is a testament to our unwavering commitment to quality and luxury.

Holistic shower therapy - Indulge in BubbleTapping

Experience the soft, rhythmic touch of BubbleRain spray. Each large, air-filled droplet is a gentle embrace, reminiscent of the traditional Swedish massage techniques. This BubbleTapping therapy offers a plethora of health benefits including improved circulation, immune system enhancement, and relaxation.

BubbleRain - Drops

BubbleRain - Chain

BubbleRain - Stream

The BubbleSpa® experience

The harmonious blend of air and water produces large, air-filled droplets that encapsulate the skin in a sensory embrace.

Each BubbleRain experience promises rejuvenation and a sanctuary from stress, a true spa-like sensation.

Multi-sensory

BubbleSpa® transforms the daily shower into a luxury spa experience that you can see, feel and hear. Discrete LEDs illuminate the bubbles which are so big they emit a satisfying sound as they softly tap and burst on the skin.

High-Definition Design

An embedded intelligent LED system illuminates each bubble, offering a visual symphony. With the touch of a button, immerse in varying BubbleRain spray patterns that beckon the senses into realms of calm and invigoration.

Air-Powered™ innovation

BubbleSpa® boasts the patented Air-Powered™ technology, a masterpiece of over a decade of innovation, ensuring unparalleled performance and indulgence.

Hydro₂ Nozzles

Nestled within the shower head, sixteen precision-engineered Hydro₂ nozzles, crafted through advanced computer modelling, weave air and water into air-filled bubbles, elevating each moment under the spray.

BubbleSpa® kits

As well as the parts supplied with your chosen interface, this kit is available with a choice of mounting options.

COMPLETE DIGITAL BATHROOM CONTROL

Unlike traditional manufacturers, TED focuses exclusively on digital bathroom technology. We are proud to be the only brand in the UK dedicated solely to digital products, setting us apart in both innovation and design.

Our digital interfaces effortlessly bring advanced technology and safety into your bathroom.

Visual temperature indicators

When you adjust the water temperature the surrounding LED backlight provides a clear, immediate visual cue by changing colour according to the temperature.

Starting with a pre-set default of 38°C, you can adjust the temperature within a range from 12°C to 45°C. The LED lights transition from shades of blue for cooler temperatures to shades of red for warmer ones, offering an intuitive and visually engaging way to gauge the water's warmth.

Cool touch

Our advanced shower controls and trim plates are isolated from the water valve, ensuring they're always cool and safe to touch.

Unlike traditional bar or thermostatic valves, none of our exposed components can scald you.

Automatic safety shut-off

If the water or power supply fails, the shower will turn off completely for your safety. This enhanced safety feature gives you complete reassurance.

Digital display

Our innovative easy to read digital displays accurately outputs the precise temperature and selected outlet. Simple, clear and highly responsive.

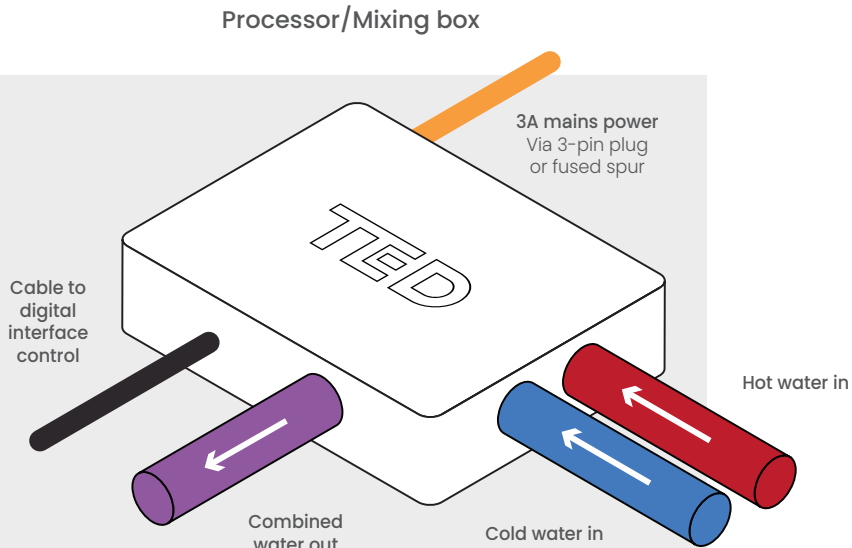

Simple installation

The compact Processor/Mixing box (and optional diverter) can be easily installed in any accessible location and mounted on the wall or floor.

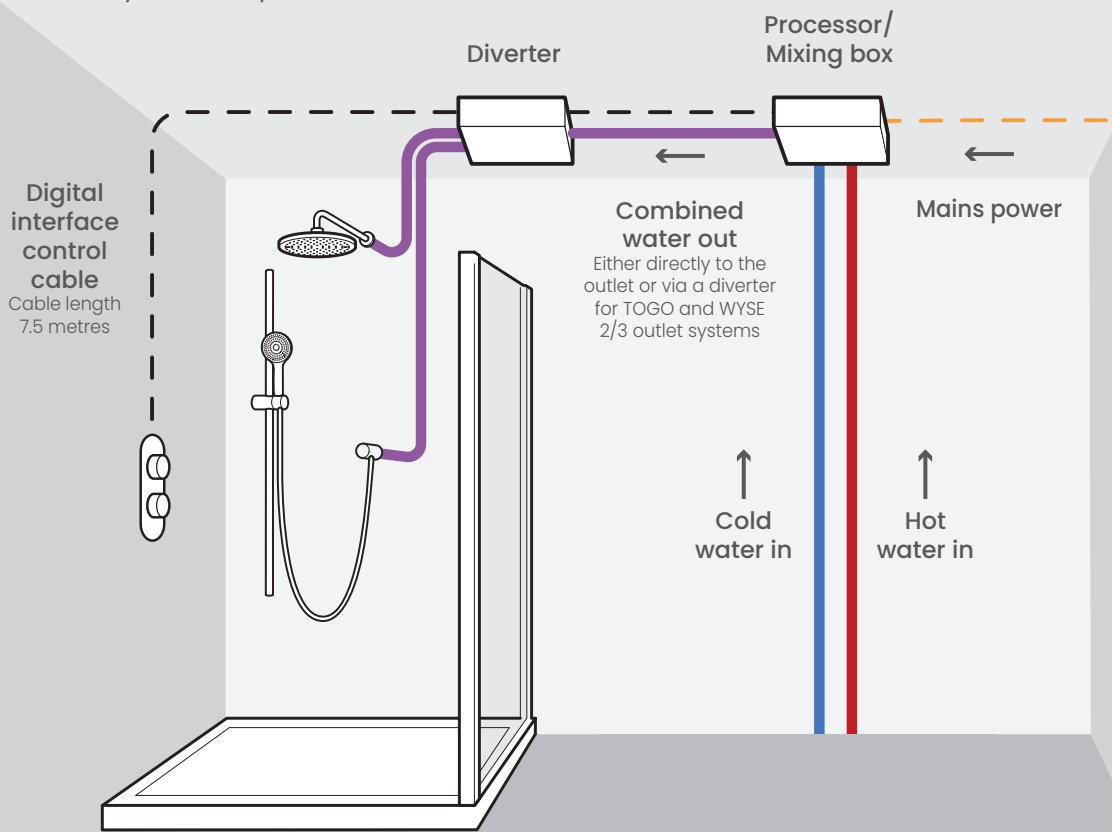

A single data cable runs to the digital control panel in the shower area. Only the mixed water outlet pipe(s) need to run to the shower head(s), keeping the installation clean and simple.

This significantly reduces installation time and offers excellent flexibility for new builds and retrofits.

Example of TOGO 2 outlet installation

Other systems may differ, visit our website for details.

IMPORTANT INSTALLATION INFORMATION

Power cable protection

Ensure the power cable is installed within a conduit for protection and easy access.

Processor accessibility

The processor must remain accessible at all times.

Processor/diverter size

Processor and diverter sizes can be found on the TED website.

FAQS

All your questions, answered.

1 | What is a digital shower?

A digital shower is a modern showering system that allows users to precisely control the temperature and flow of water through electronic interfaces, offering a more customised and consistent shower experience.

2 | How does a digital shower work?

Digital showers work by taking water from both the hot and cold supplies, mixing them within a digital valve to your desired temperature, and then delivering the mixed water to the shower head. The controls communicate with the valve either wirelessly or via a cable.

3 | Are digital showers safe?

Yes, our digital showers have built-in safety features. They can offer precise temperature control, often preventing sudden temperature spikes. Many models also have automatic shut-offs if the water temperature goes beyond a safe range.

4 | How are digital showers powered?

Digital showers can be powered by batteries, mains electricity, or a combination of both. Always ensure installations are done by qualified professionals and adhere to local building and electrical codes.

5 | Can I have a digital shower with low water pressure?

Many digital showers are designed to work with various water systems, however if you have a low pressure system, you can purchase a universal pump to boost water pressure.

6 | What's the difference between a digital shower and a traditional mixer shower?

While both mix hot and cold water to achieve the desired temperature, digital showers offer electronic control for a more precise and consistent temperature. Traditional mixers rely on manual adjustments.

7 | Can I retrofit a digital shower in my existing bathroom?

Yes, digital showers can often be retrofitted into existing shower spaces, though installation complexity may vary based on your current plumbing setup.

TED DIGITAL WARRANTY TERMS AND CONDITIONS

At TED Digital, we aim to keep our warranty straightforward, customer-friendly, and free from registration requirements. Our guarantees apply automatically from the date of purchase, provided you retain proof of purchase (such as a receipt or invoice) for any claims. This warranty covers manufacturing defects in materials and workmanship under normal use and installation by a qualified professional. It does not cover damage from misuse, abuse, neglect, accidents, improper cleaning, improper installation, unauthorised modifications, or normal wear and tear.

Guarantee Periods

- **Digital components** (e.g., processors, controls, and electronic parts): 5 years.
- **Consumable items** (e.g., hoses, washers, seals, and similar replaceable parts): 1 year.
- **Accessories** (e.g., shower heads, handsets, and metal parts of controls): 10 years.

Coverage Details

- For the first 1 year from purchase, we cover both parts and reasonable labour costs for repairs or replacements.
- After the first year, coverage is for parts only; you are responsible for any labour or installation costs.
- “Dead on Arrival” (DOA) claims: If a product arrives faulty and does not function upon initial setup, we will cover parts replacement. However, labour costs are only included if the product was fully installed by a qualified professional, handed over to the end customer, and confirmed as satisfactorily operational before the fault was reported. If installation was incomplete or improper, labour claims are excluded to ensure accountability in the setup process.

How to Make a Claim

Contact our customer support team with details of the issue, product model, and proof of purchase. We may request photos, diagnostic information, or return of the faulty item for inspection. If validated, we will repair, replace, or refund at our discretion (limited to the original purchase price). Shipping costs for returns may be reimbursed if the claim is approved.

Exclusions and Limitations

- This warranty is non-transferable and applies only to the original purchaser.
- It is applicable to installations within the United Kingdom only.
- It does not cover consequential damages, loss of use, or third-party costs.
- Products used for commercial purposes may have adjusted terms—contact us for details.
- We reserve the right to void the warranty if the product is tampered with or serviced by unauthorised parties.

This policy aligns with consumer rights under UK law and supersedes any prior versions. It was published on 30 October 2025. For questions, reach out to our support team at info@teddigital.co.uk or call 01257 650 695.
