The illustration shows a typical loft-mounted installation, where the Diverter and Processor/Mixing Box are concealed in the loft.

IMPORTANT INSTALLATION INFORMATION:

Power Cable Protection:

Ensure the power cable is installed within a conduit for protection and easy access.

Processor Accessibility:

The processor must remain accessible at all times.

Connecting the Wireless Button:

- Completely power off the digital system: Unplug it from the wall, then immediately plug it back in, or
- Remove the fuse from the spur and immediately replace it.
- Quickly press the wireless button twice and wait for several seconds.
- Press the wireless button again. It should now be paired with the system.
